**Subject:** Thanks

Dear Colleagues,

Just a note to say what a pleasure and professional high point it has been to work with you on this simulation. The work you all have done has made this a flawless (relatively speaking) bit of empirical work. I know that the FAA and the Europeans are very impressed with your capability. It was made known that the FAA made the "best choice" in working with you all on this experiment. You are excellent.

I have some notes and some hypos and other stuff owed to you. I will sort it out over the weekend and ship it off.

Thanks you for the great effort.

Best  
KC
